## Fire Hydrant System

Installation Consists Of A System Of Pipe Work Connected Directly To The Water Supply Main To Provide Water To Each And Every Hydrant Outlet And Is Intended To Provide Water For The Firemen To Fight A fire

## Fire Sprinkler System

A fire sprinkler system is a type of automatic extinguishing system (AES) that prevents fire growth and spread by releasing water through a series of sprinkler heads connected to a distribution piping system

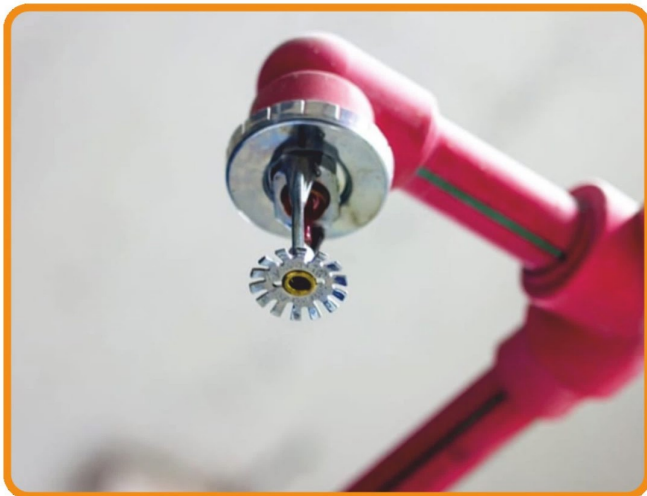

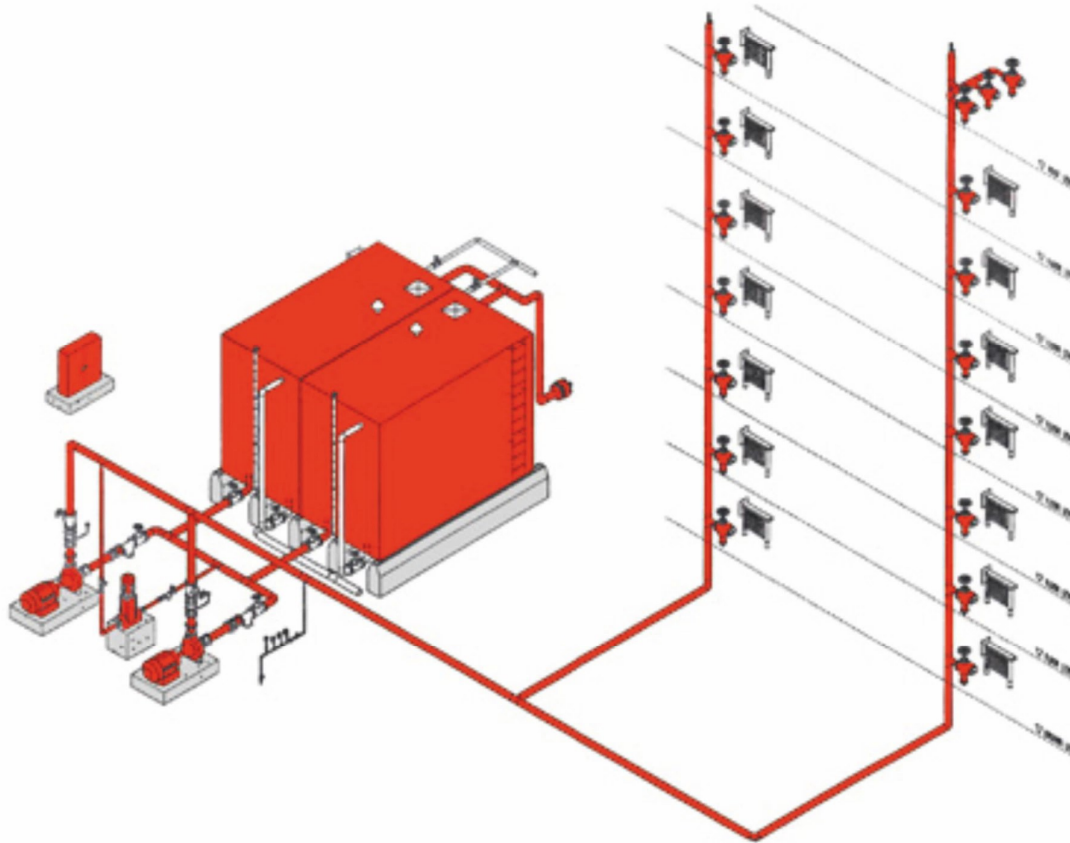

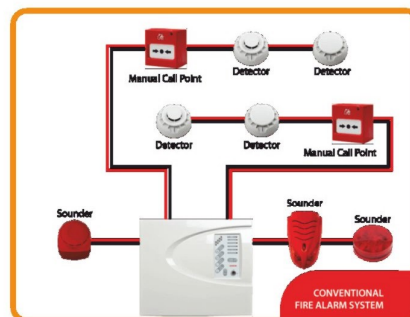

Diagram illustrating the NOBLE fire alarm system architecture. The central component is the NOBLE fire alarm control panel, which is connected to various sensors and devices via wireless communication (indicated by dashed lines).

**Connected Devices:**

- Special Sensor
- Temperature Sensor
- Manual Call Point
- Gas Sensor
- Supervisory Monitoring Devices (SMD)
- Equipment Trigger Devices (ETD)
- Flame Detector
- Smoke Detector
- Sounders

The NOBLE panel is also connected to a mobile application (App) and a Cloud Server. The Cloud Server is connected to the EMS (Emergency Monitoring System) center.
